

ACTIVITY : REDUCE BEARING RELATED PROBLEMS

Distributors : **TIMKEN**® Spherical Cylindrical, Needle & Tapered Roller Bearings

Bearing Care Accessories

IMPACT FITTING TOOL

Proper mounting is essential to ensure long bearing life.

Designed to permit the safe, precise & quick mounting of bearings, bushing, sealing rings, cam wheels & pulleys, the Timken Impact Fitting Tool Set features impact resistant shaft damage that can occur.

During the mounting of bearings, such as ball and spherical roller bearings where the faces lie in the same plane, the collets enable the load to be transmitted to the ring experiencing the interference fit. In this way, mounting forces are not transmitted via the rolling elements and hence damage to the raceways is avoided.

SINGLE-POINT LUBRICATORS

Proper lubrication is critical to bearing and machine performance. In fact, poor lubrication is one of the leading causes of bearing failure. To help reduce this, Timken offers the G-Power and M-Power series of single-

Permatex Industrial Products

- Threadlockers
- Thread Sealants
- Retaining Components
- Gasketing
- Adhesives & Sealants
- Maintenance & Repair
- Lubricants
- Cleaners
- Hand Cleaners

INDUCTION HEATERS

Proper mounting lengthens the life span of your bearings. When mounting bearings or other components, induction heating is superior to traditional methods. In addition to providing even, damage-free heating is quick, safe and environmentally friendly.

UNIVERSAL JOINTS

With the technology accumulated over a half a century, Najico has developed and delivered thousands of products suited to the applications to cope with a variety of customer requirements. These Najico heavy and super heavy duty universal joints mainly supply the steel and metal mill market, such as main roll of Hot strip mill & Plate mill whose specification is high torque with small swing diameter or heavy duty machines with large impact torque.
